4. After additional articles came out and Secretary Spicer gave his press conference on January 23, FBI decided to interview General Flynn on January 24th. During this interview the FBI asked General Flynn about his contacts with the Ambassador. General Flynn recalled a conversation about Israel after prompting by the FBI, but denied having conversations about sanctions. FBI advised that based on this interview, they did not believe General Flynn was acting as an agent of Russia. FBI also advised that although they recognized the statements were inconsistent with the FISA collection, they believed that Flynn believed what he was telling them. FBI did not confront Flynn with the communications during the interview.

- Wednesday, January 25, 2017: FBI briefs NSD and ODAG staff on their interview. FBI advised that the purpose of the interview was to determine if General Flynn was acting as an agent of Russia. FBI advised that General Flynn was very open and forthcoming. When asked about his contacts with the Ambassador, General Flynn responds with the same four topics described by Press Secretary Spicer. FBI asks General Flynn if he has had any conversations regarding the Israeli vote. He thanks the FBI for reminding him and states that the calls around that time were done in "table-top exercise" fashion to ensure that they had the correct contacts and that Russia was one of many calls. FBI then asked General Flynn if he had any conversations about the sanctions. Flynn denied having the conversation and stated he would not have that type of a conversation. FBI prompted Flynn with language used during the call and he still denies having the conversation. FBI advised that they believed Flynn believed what he was saying was true. FBI recognized the discrepancy between the statements and the actual calls, but determined that Flynn was not acting as an agent of Russia. FBI advised that the decision was made by FBI leadership not to confront Flynn with the actual tech cuts.
